DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-29 are drawn to a method for servicing moveable items, classified in class 705, subclass 26.
 - II. Claims 30-54, drawn to a building, classified in class 52, subclass 79.1, 175.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II are related as subcombinations disclosed as usable together as a single combination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention I, to provide a retail environment where a customer may place an order for services for movable serviceable item does not require the multiple use properties of the remote servicing facility for proper operation.

Likewise, Invention II, A Remote Multiple Use service facility does not require the Retail Environment provided by Invention I for proper operation
3. The Examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of a claim that is allowable in the present application, such claim may be subject to provisional and / or nonstatutory double patenting rejections over the claims of the instant application.

Art Unit: 3627

4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner, if restriction is not required because the inventions have acquired a separate status in the art in view of their classification thereby requiring a different field of search (see MPEP §808.02), restriction for examination purposes as indicated is proper.
